
Course 5047: Introduction to Installing and Managing Microsoft Exchange Server 2007

3 days - Instructor-Led

Introduction

“Elements of this syllabus are subject to change”

At the end of this three-day course, students who are new to Microsoft Exchange Server will learn how to configure and manage a messaging environment in accordance with technical requirements. Students will learn how to install Microsoft Exchange Server 2007 and manage routing, client access, and the backup and restore of databases. They will also learn how to manage addressing and recipient objects such as mailboxes, distribution groups, and contacts.

Audience

IT Professionals, IT generalists, and help desk professionals who want to learn about Exchange Server 2007 are the audience for this course. IT Professionals, IT generalists and help desk professionals should have at least 3 years experience working in the IT field—typically in the areas of network administration, help desk, or system administration. No experience with Exchange Server is necessary.

Prerequisites

This course requires that students meet the following prerequisites:

- Experience using these tools and applications:
 - NTBackup command.
 - NSLookup command.
 - Windows Explorer
 - Microsoft Management Console (MMC)
 - Active Directory Users and Computers
 - Active Directory Sites and Services
 - Internet Information Services (IIS) Admin
 - Outlook
 - Working knowledge of Windows server operating system. For example, how storage is configured, basic backup and restore techniques, and what a client/server application interaction means.
 - Working knowledge of network technologies. For example, what Transmission Control Protocol (TCP/IP) and Domain Name System (DNS) do and how to use them, basic routing concepts (Wide Area Networks (WAN) vs. Local Area Network (LAN) router vs. switch vs. hub).
 - Working knowledge of Active Directory. For example, how user objects are managed, what is stored in Active Directory partitions, basic architectures (domain, forest, sites, etc.), and how domain controllers are managed. Also, site and site connector configuration, schema and configuration partitions, and Global Catalogs.
 - Conceptual understanding of e-mail technologies For example, that Simple Mail Transport Protocol (SMTP) is a protocol used for e-mail and the differences between transport protocols and client access protocols (Post Office Protocol (POP), Internet Access Message Protocol (IMAP), SMTP).
-

At Course Completion

After completing this course, students will be able to:

- Describe how Exchange Server 2007 and the Active Directory directory service work together.
- Install Exchange Server 2007.
- Configure Mailbox server roles.
- Manage recipient objects.
- Manage e-mail and address lists.
- Manage client access.
- Manage Messaging Transport.
- Manage availability, backup and recovery.

Course 5047: Introduction to Installing and Managing Microsoft Exchange Server 2007

3 days - Instructor-Led

- Maintain the message system.

Microsoft Certified Professional Exams

This course will help the student prepare for the following Microsoft Certified Professional exam:

- Exam Exam 70-236: Implementing; Troubleshooting
 - Exam and Maintaining a MS Exchange Server 2007 Infrastructure.
-

Course Materials

The student kit includes a comprehensive workbook and a Student Materials compact disk for this class.

Course Outline

Module 1: Overview of Exchange and Active Directory

In this module, students will first learn:

- Overview of Microsoft Exchange Server 2007 and Active Directory directory service
- Introduction to the Integration of Active Directory and Exchange Server 2007
- Lab: Overview of How Active Directory and Exchange Server 2007 Work Together
- Discussion: Explaining How Exchange and Active Directory Work Together

After completing this module, students will be able to:

- Describe how Exchange Server 2007 and Active Directory work together.
- Describe the core components of the Active Directory directory service.
- Describe the integration of Active Directory and Exchange Server 2007.

Module 2: Installing Exchange Server 2007

In this module, students will first learn:

- Introduction to the Exchange Server 2007 Server Roles
- Installing Exchange Server 2007
- Completing the Exchange Server 2007 Installation
- Lab 1: Installing Exchange Server 2007
- Preparing the Environment for an Exchange Server 2007 Installation
- Installing Exchange
- Lab 2: Verifying an Exchange Server 2007 Installation
- Verifying an Exchange Server 2007 Installation

After completing this module, students will be able to:

- Students will be able install Exchange Server 2007
- Describe the Exchange Server 2007 server roles.
- Install Exchange Server 2007.

Module 3: Configuring Mailbox Server Roles

In this module, students will first learn:

- Overview of Exchange Server 2007
- Implementing Mailbox Server Roles
- Managing Public Folder Databases
- Lab: Configuring Mailbox Servers
- Configuring Storage Groups and Database Files
- Configuring a Public Folder and Store Referrals

After completing this module, students will be able to:

- Students will be able to configure Mailbox Server roles.
- Describe the Exchange Server 2007 Administration Tools.
- Implement Mailbox Server roles.
- Manage Public Folder databases

Module 4: Managing Recipient Objects

In this module, students will first learn:

- Managing Mailboxes
- Managing Other Recipients
- Overview of Managing Public Folders
- Lab: Managing Recipient Objects
- Modifying Existing Mailboxes
- Configuring New Mailboxes and Mail-Enabled Objects
- Managing Resource Mailboxes
- Managing Mailbox Removal

After completing this module, students will be able to:

Course 5047: Introduction to Installing and Managing Microsoft Exchange Server 2007

3 days - Instructor-Led

- Students will be able to manage recipient objects.
- Manage mailboxes.
- Manage other recipients.
- Manage public folders.
- Manage Mailbox removal.

Module 5: Managing E-Mail Addresses and Address Lists

In this module, students will first learn:

- Configuring E-Mail Address Policies
- Configuring Address Lists
- Overview of Bulk Recipient Management Tasks
- Lab: Managing E-Mail Addresses and Address Lists
- Managing E-Mail Address Policies
- Managing Address Lists
- Performing Recipient Bulk Management Tasks

After completing this module, students will be able to:

- Students will be able to manage e-mail and address lists.
- Configure e-mail address policies.
- Configure address lists.
- Describe bulk recipient management tasks.

Module 6: Managing Client Access

In this module, students will first learn:

- Implementing Client Access Servers
- Implementing Client Access Features
- Implementing Outlook Web Access
- Introduction to Implementing Mobile Messaging
- Lab: Managing Client Access
- Configuring Client Protocols
- Managing Outlook Web Access Connectivity
- Managing Mobile Device Connectivity

After completing this module, students will be able to:

- Students will be able to manage client access.
- Implement client access servers.
- Implement client access features.
- Implement Outlook Web Access.
- Implement Mobile Messaging.

Module 7: Managing Messaging Transport

In this module, students will first learn:

- Introduction to Message Transport
- Implementing Message Transport
- Lab: Managing Messaging Transport
- Troubleshooting Local Message Delivery
- Troubleshooting Remote Message Delivery
- Discussion: Troubleshooting Message Transport

After completing this module, students will be able to:

- Students will be able to manage messaging transport
- Describe how Message Transport works in Exchange Server 2007.
- Implement Message Transport.

Module 8: Managing Availability, Backup and Recovery

In this module, students will first learn:

- Implementing High-Availability for Mailbox Servers
- Managing a Backup Solution
- Managing a Recovery Solution
- Lab: Managing Backup and Recovery
- Backing Up and Restoring Mailbox Databases
- Restoring Mailbox Databases using Local Continuous Replication (LCR)
- Restoring Data using the Recovery Storage Group

After completing this module, students will be able to:

- Students will be able to manage availability, and backup and recovery.
- Implement high-availability for mailbox servers
- Manage a backup solution.
- Manage a recovery solution.

Module 9: Maintaining the Messaging System

In this module, students will first learn:

- Overview of Implementing Change Management
- Overview of Updating Exchange Servers
- Lab: Maintaining the Messaging System
- Determining the Information Necessary for Change Management Request

After completing this module, students will be able to:

(703) 246-9100 Northern Virginia
(804) 285-5830 Central Virginia
(757) 420-3810 Tidewater Area
(800) 294-7497 Toll Free
(804) 285-3722 Fax
www.ACTISIT.com

Course 5047: Introduction to Installing and Managing Microsoft Exchange Server 2007 3 days - Instructor-Led

- Students will be able to maintain the message system.
- Describe implement change management.
- Describe how to update Exchange Servers.
